## Evergreens

Concolor Fir – One of the most beautiful and easy to care for evergreens. Silver trunk and soft silvery-blue to silvery-green 2-3" long needles. Holds its needles the best of any short-needle tree. Needs good drainage.

Austrian Pine - A beautiful dark green, long needle evergreen. Needles are 3½ - 6½" long. Grows well in almost any soil. Used for Xmas trees and for thick screens and windbreaks.

Red Pine- Large sized 75-100' with oval crown and straight trunk. 4-6" needles. Red Pine stands provide cover, nesting sites and some food for many species of birds and animals.

Colorado Blue Spruce - Highly valued as a colorful windbreak, screen or Xmas tree, this spruce has stiff, silvery-blue to green 1" long needles. Will grow in ordinary soil with average moisture but does best in a well-drained, deep soil.

Norway Spruce - One of the faster growing spruces it has dense, dark green needles 1" long. Also one of the best varieties for poorly-drained, clay soils. Used for windbreaks and Xmas trees.

White Spruce - This evergreen has short, stiff, bluish-green needles about 1" long. It is a hardy tree that can endure heat and drought. Grows well in moist to well-drained soils and provides an excellent windbreak and Xmas tree.

White Cedar- Grows to 60' with flat, scale-like evergreen foliage. Grows well in a variety of soils including swampy areas. Pyramidal in growth and well suited for windbreaks when planted 4' apart.

Canaan Fir - Dark to bluish dark green needles, the undersides of the needles have two white stripes very similar to the Fraser Fir with more limber branching. Naturally adapted to overly moist sites and late frosts.

Balsam Fir – Native to northeast, it has ½" to 1¼" long, soft needles that are very aromatic. Needs a cool, moist, well-drained soil and full sunlight.

Douglas Fir - The color, symmetrical form and needle holding ability of this evergreen make it the most popular Xmas tree. Needles are blue-green and soft and the Douglas Fir is a vigorous grower in moist, well-drained, light soils.

Fraser Fir - This excellent Xmas tree has shiny, dark green ½-1" long needles that are lighter on the underside. This fragrant tree needs good drainage for best growth.

White Pine - Fast growing species that will reach 100' tall. Does best in full sun and can grow in wet, swampy areas.

## Deciduous Trees and Shrubs

Butterfly Bush – 5-12' multi-stemmed shrub. Fragrant flowers July through fall. Attracts butterflies. Tolerates most soils.

Am. Beauty Bush- Grows 3-5' tall, with violet flowers turning to glossy purple fruit . Great food source for attracting birds and deer. Needs some shade, and works best in well drained soils but will grow anywhere.

Elderberry – Multi-stemmed 5-12' shrub. White flowers in mid-June, purple fruit in mid-August. Tolerates most soils and roadside conditions.

Lilac – 8-12' leggy, upright shrub. Fragrant flowers in mid-May. Provides good habitat for birds.

Buttonbush – 3-6' rounded shrub. Great for planting in wet areas, and along ponds. Has white flower clusters in 1 1/2" balls.

Red Osier Dogwood – 7-9' slender, upright shrub. Red stem, white drupe fruit mid-August. Best in wet or swampy conditions. Good structure for holding soil on sloped areas.

Rose of Sharon - 8-12' erect shrub or small tree with numerous upright branches. Flowers July through September. Tolerates full sun and dry conditions.

Silky Dogwood – 6 to 10' red, multi-stemmed shrub. White/purplish fruit in August attracts birds. Thrives in moist & wet soils.

Strawberry Bush - 6-12' airy shrub. Pale green flowers and bright green oval leaves that become dark red in fall. Bright red fruits open to reveal orange seeds. Grows well in many soil types and tolerates shade.

Strawberry Bush- Small, thin shrub. Yellow-green inconspicuous flowers develop into odd red fruits that burst open in late fall. Grows well in many soil types and tolerates shade.

Ninebark - 5-9' spreading shrub. White flowers in May-June followed by red fruit in mid-September. Tolerates full sun and dry conditions. Beautiful exfoliating bark.

Sweet Mockorange- Up to 10-12' tall. Produces fragrant white flowers. Grows in moist to well-drained soils, and tolerates wind.

Crabapple Sargent- 6-8' high, densely branched tree. Fragrant white flowers, red in bud. Fruit edible to humans and birds. Prefers well drained soils.

Native Birch - 50' high, single or multi-stemmed slender tree. White bark appears after 3-4 years. Grows well in most soils and provides habitat for wildlife.

Black Cherry – 50' tall, pendulous branched tree. Good food source for wildlife. Intense fall leaf color.

White Flowering Dogwood - 20'-30' high, low branching tree. Dark green leaves turn to red-purple in the fall. Showy white flowers in late April-May. Red glossy fruit persists until late December and is a favorite of birds.

American Filbert – Also known as hazelnut it grows to 10'. Flowers in April-May, produces edible nuts in July-September. Nuts are enjoyed by many species of birds and animals.

Red Maple – 60' high with equal spread. In fall the leaf color will range from green to flaming orange. Very tolerant of most soils but prefers slightly acid soils.

Sugar Maple – 50' high, spreading canopy tree. Prefers well-drained soils. Brilliant fall leaf colors, pleasing growth habit.

Honey Locust – A fast growing tree that will withstand a wide range of soil conditions. Provides a filtered shade and grows to a height of 30-70'

Sycamore – This 75-100' fast growing shade tree has unique (camouflage)exfoliating bark. Tolerant of adverse urban conditions

Red Oak - 60' high, 40' wide tree. Fast growing oak that prefers loam soils that are slightly acid. Excellent timber tree that also provides good fall color and abundant food for wildlife.

Willow Stream-Co – 8-10' tall round, dense shrub. Great for bank stabilization, as it grows well in moist and poorly drained areas. Leaves show a silvery color to it, along with purple twigs in the first year.

Tulip Tree – 70-90' fast growing tree. Flowers May-June with greenish-yellow petals. Full sun, well-drained soil is best.

Sassafras – 30-60' aromatic tree or thicket forming shrub. Bluish-black berry a favorite of birds. Prefers light shade.

Blueberry Highbush – 6-12' tall, crown forming shrub. Fruits are ¼ - ½" blue-black berries with many seeds. Early variety is Blue Crop and the mid variety is Jersey.

Blackberry – Variety is darrow.

Raspberry – Variety is latham.

Daylily – 12" high perennial with yellow to yellow-orange flower. Thrives in most soils and tolerates light shade. Drought resistant with extensive root system that provides erosion protection.

Hosta – 22" high spreading plant. Blue-green leaf color with funnel-shaped, lavender flower in July. Prefers shade and well drained soil. Extensive root system is excellent for erosion control. Disease resistant.

Christmas Fern- 1-2' tall and dark green in color. Has a Christmas stocking appearance. Needs full to partial shade.

Wildflower Pac- This pack includes a variety of seedling plants that are native and attract birds and pollinator insects.

Forsythia - 8-10' upright and wide shrub. Yellow flowers in April for 2-3 weeks. Prefers loose soil, but does well in any type. Full sun needed for maximum flower.

Serviceberry- 6-20' upright, tight, multi-stemmed shrub. Brief white flowers in April. Sweet, juicy black fruit attracts birds. Thrives in moist, well-drained, acid soils in full sun to partial shade.

## Miscellaneous

Bluebird Boxes - Help save New York's state bird. Constructed of rough-cut lumber.

Fertilizer Tablets - Slow release fertilizer, will not cause root burn. One tablet in each planting hole, 2" below the roots will fertilize your plants for up to 3 years.

Rain Barrels – 60 gallon heavy plastic barrel with screened inlet for downspout and a spigot for a hose on the bottom.
